

THE CHRONICLE SNAPSHOT BOX

Do you Support a Family Member in Care?

Our Snapshot Memory Boxes use pre-recorded audios from family members to bring reassurance and comfort to people in care, including those with early-stage dementia or at risk of isolation.

How they work:

- Pre-configured with sound recordings and a photo (which you send to us)
- Up to 8 minutes of audio playback (either one or multiple recordings of voices, sounds or music)
- Simple one-push button playback for self-use or carer support
- Benefits backed by University of Suffolk Research
- Beautifully crafted and made in Suffolk

ACT NOW! Contact us to find out about our free box scheme (conditions apply).

Comfort
Through
Voices

“Our findings show strong evidence of a positive impact for users of the Snapshot Memory Box, including those at risk of isolation from loved ones and/or living with mild cognitive impairment such as early-stage dementia and/or Alzheimer’s.” - University of Suffolk
